KONG **U-Shot**

The Kong U-Shot is a telescopic pole to achieve unique angles, steady shots and stable recording.

Ultra-lightweight, you can carry it with you anywhere and use it straight from the bag. Its mere 630g still enables you to load it with up to 3.5kg of equipment. This telescopic pole is resistant and durable, so that you can use it in rough conditions.
Suited for all digital cameras and tripods its telescopic pole reaches up to 155cm and can be extended quickly in one gesture, or slowly to create a travelling effect.
Mobile, and reliable, Kong U-Shot will enable you to reach new heights in action capture.
